MEISTERKLASSE GLOCKENSPIELS

The excellent sound and soft shape of the resonator boxes of these glockenspiels invite creative playing. The metal bars of the Meisterklasse glockenspiels are 20 % wider. This enhances playability and offers a greater sound spectrum.

- Special alloy metal bars 25 x 5 mm, fundamental tuning, resonator made of beechwood, solid and plywood

Soprano

SG 13	13 bars, c3-f4, 1 pair SCH 3 and SCH 95, C-major scale with f-sharp3 and b-flat3
SG 19	19 bars, c3-c5, 1 pair SCH 3 and SCH 95, C-major scale with f-sharp3, b-flat3, f-sharp4 and b-flat4
SG 25	25 bars, c3-c5, 1 pair SCH 3 and SCH 95, chromatic scale

Sonorous and functional

These glockenspiels of the Meisterklasse series stand out due to their clear, bell-like, yet warm and rich sound. The beautiful looks of brushed steel and the innovative magnetic accidental and mallet storage make these glockenspiels special.

- Steel bars 25 x 3 mm, fundamental tuning, resonator made from solid pinewood and plywood, with embedded magnetic accidental and mallet storage

Soprano

GSM 16 bars, c3-a4, 1 pair SCH 3,
C-major scale with f-sharp3, b-flat3 and f-sharp4

Alto

GAM 16 bars, c2-a3, 1 pair SCH 2,
C-major scale with f-sharp2, b-flat2 and f-sharp3

**PRIMARY GLOCKENSPIELS**

The Primary glockenspiels SGP and AGP support music reading. The bars with the print of the note enable a visual connection between the sheet music and the instrument. When improvising with self-created melodies the children always have a visual reference to the printed notation. From the other perspective the players get a feeling of what a printed note sounds like. Surface protection of all wood finishes with "Proterra".

- Silver steel sound bars, 20 x 3 mm in size, with fundamental tuning and resonator boxes made of pinewood, solid and plywood.

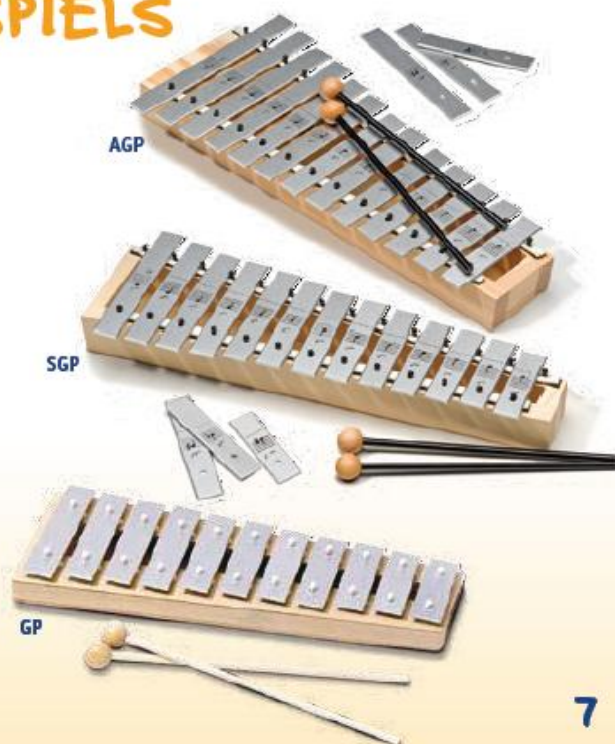

Soprano

SGP 16 bars, c3-a4, 1 pair SCH 95,
C-major scale with f-sharp3, b-flat3 and f-sharp4

GP 14 bars, c3-f-sharp4, 1 pair SCH 40,
C-major scale with f-sharp3, b-flat3 and f-sharp4

Alto

OTHER GLOCKENSPIELS

Glockenspiel with metal bars in Boomwhackers colors. The resonator box has soft edges and an integrated mallet holder.

Soprano

BWG 13 bars, c3-f4, 1 pair SCH 40, C-major scale with f-sharp3 and b-flat3 nursery rhymes with colored notes

BOOMWHACKERS®

Boomwhackers® is a registered trademark of Rhythm Band Instruments, LLC.

Child's Glockenspiels

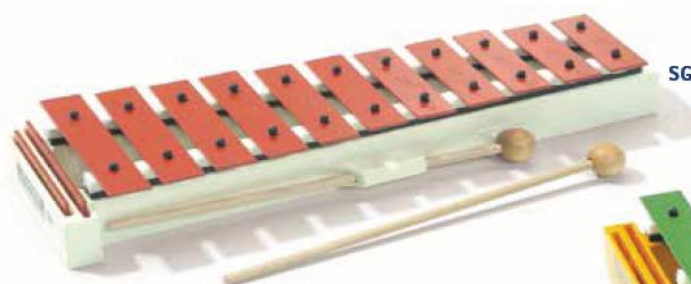

A particularly child-oriented design is the main feature of the child's glockenspiel range. They have soft edges and an integrated mallet holder. The sound is very clear and not only suited to children's ears.

Integrated holder for replacement bars of SG, SGB and GS glockenspiels

Soprano

SG	13 bars, c3-f4, 1 pair SCH 40, C-major scale with f-sharp3 and b-flat3

PRIMARY XYLOPHONES

Primary – The Future Sounds Green!

Primary xylophones support music reading. The bars with the print of the note enable a visual connection between the sheet music and the instrument. When improvising with self-created melodies the children always have a visual reference to the printed notation. From the other perspective the players get a feeling of how a printed note sounds like.

All Primary xylophones have 35 x 18 mm Pao Rosa sound bars with overtone or fundamental tuning. The redesigned stepped resonator boxes are made of solid birch plywood to prevent warping.

The sound bars and resonator boxes of SONOR Primary xylophones are FSC certified, which means that only timber from well managed forests are being used. In addition an environmentally safe finish is used, based on shellac, oil and carnauba wax.

Surface protection of all wood finishes with "Proterra"

Bags for replacement bars see page 55

PRIMARY METALLOPHONES

Proterra

Surface protection of all wood finishes with "Proterra"

Bags for replacement bars see page 55

Primary – The Future Sounds Green!

Primary metallophones support music reading. The bars with the print of the note enable a visual connection between the sheet music and the instrument. When improvising with self-created melodies the children always have a visual reference to the printed notation. From the other perspective the players get a feeling of how a printed note sounds like.

All Primary metallophones have 35 x 5 mm (Soprano and Alto) or 35 x 10 mm sound bars with fundamental tuning. The newly constructed resonator boxes are made of solid birch plywood.

The resonator boxes of the SONOR Primary metallophones are FSC certified, which means that only timber from well managed forests are being used. In addition an environmentally safe finish is used, based on shellac, oil and carnauba wax.

Soprano

SMP 1.1	16 bars, c2-a3, 1 pair SCH 5, C-major scale with f-sharp2, b-flat2 and f-sharp3
SMP 2.1	7 bars, sharp: c2, d2, g2, c3, d3, g3, flat: b3, chromatic extension for SMP 1.1
SMP 3.1	Chromatic set consisting of SMP 1.1 and SMP 2.1

Alto

GLOBAL BEAT METALLOPHONES

All Global Beat metallophones have 35 mm wide metal sound bars made of special alloy with overtone or fundamental tuning and resonator boxes made of birch plywood.

Each metallophone is equipped with a carrying bag for 3 sound bars (2 x f-sharp, 1x b-flat).

Soprano

MS GB 16 bars, c2-a3, 1 pair SCH 5, C-major scale with f-sharp2, b-flat2 and f-sharp3

Alto

MA GB 16 bars, c1-a2, 1 pair SCH 5, C-major scale with f-sharp1, b-flat1 and f-sharp2

Deep Bass

MGB GB 16 bars, c-a1, 1 pair SCH 15, C-major scale with f-sharp, b-flat and f-sharp1

Note name labels inside the resonator box make it easy to put bars back in their proper places.

OTHER METALLOPHONES

The metallophones SM and AM are compact in size and should find a firm place in any children's room. The sound character is warm and full-bodied. Surface protection of all wood finishes with "Proterra".

Soprano

SM 13 bars, c2-f3, 1 pair SCH 17, C-major scale with f-sharp2 and b-flat2

Alto

AM 16 bars, c1-a2, 1 pair SCH 5, C-major scale with f-sharp1, b-flat1 and f-sharp2

Surface protection of all wood finishes with "Proterra"

CHIME BARS

Arrange Tones to Suit Your Preference!

SONOR chime bars offer almost unlimited flexibility. The sequence can be arranged or grouped completely to individual requirements. The instrument setup KS 40 L 15 illustrates this feature in detail. Here are two examples of playing and arrangement ideas:

Example 1

- 15 players get one chime bar each with one mallet.
- The players assemble in 3 groups:
 - green, red, blue.
- Twinkle, twinkle, little star, how I wonder what you are!
Up a-bove the world so high, like a diamond in the sky.
Twinkle, twinkle, little star, how I wonder what you are!
- A conductor (teacher) gives the cue.

Example 2

- Only the red and green chime bars from the KS 40 L 15 set are needed.
- 10 players each get one chime bar with a mallet.
- The players assemble in 2 groups:
 - green, red.
- London Bridge is falling down, falling down, falling down
London Bridge is falling down, my fair lady
- A conductor gives the cue.

BOOMWHACKERS CHIME BARS

These chime bars feature metal bars in official Boomwhacker colors with note names in large visible labels to reinforce note recognition. The bars can be lined up in a row, grouped by triads or distributed in class as single instruments getting more children involved. Due to the unique arrangement of colors and notes, it is easier to play songs without extensive notation experience.

Having bars which match the official Boomwhacker colors makes it easy to use alongside the wide variety of instructional material already available.

This set is a great choice to use in classrooms, therapy settings, or active music making anywhere.

TIMPANI

Meisterklasse Rotary Timpani

The principle of the rotary kettledrum for orchestral use, known since 1821, has been combined in the SONOR rotary timpani with a tried-and-tested system of central tuning. The technical advantage of the SONOR timpani lies in the unimpeded transfer of vibration from the head to the shell. The construction of the SONOR rotary timpani is based on over 125 years' experience. Suitable mallets are: SCH 6, SCH 7, SCH 8 or SCH 60

Original calfskin

System of central tuning

Meisterklasse Rotary Timpani

with calfskin heads and three stand legs ST

V 1570	Ø 10" (25 cm), tonal range approx. c - a
V 1571	Ø 13" (33 cm), tonal range approx. G - e
V 1573	Ø 16" (40 cm), tonal range approx. E - c
V 1574	Ø 18" (46 cm), tonal range approx. C - G

Meisterklasse Screw Adjustment Timpani

The easiest and most traditional type of timpani tuning mechanism is the tension screw system. By turning 5 to 8 tension screws (depending on the diameter of the timpani) to the right, the head is tightened and the pitch increased. If the tension screws are turned to the left, the head is loosened and the pitch becomes lower.

Suitable mallets are: SCH 6, SCH 7, SCH 8 or SCH 60

Meisterklasse Screw Adjustment Timpani

with calfskin heads and three stand legs ST

V 1550	Ø 10" (25 cm), tonal range approx. c - a
V 1551	Ø 13" (33 cm), tonal range approx. G - e
V 1553	Ø 16" (40 cm), tonal range approx. E - c
V 1554	Ø 18" (46 cm), tonal range approx. C - G

Primary Screw Adjustment Timpani

These timpani can be used as timbales or tom toms. The unique shape of the tension hoops and the durable plastic heads allow for dynamic playing. These heads are also used for drum sets. Compared with natural heads a plastic head is resistant against humidity thus ensuring perfect pitch. Whether dry or humid weather – Primary timpani always offer excellent sound. Suitable mallets are: SCH 6, SCH 7, SCH 8 or SCH 60

Primary Screw Adjustment Timpani

with plastic heads and three stand legs ST

TP 13	Ø 13" (33 cm), tonal range approx. G - e
TP 16	Ø 16" (40 cm), tonal range approx. E - c

HAND DRUMS

SONOR Hand Drums are made according to high quality standards in a wide variety of designs and dimensions. Hand Drums are available either with select natural skins or plastic heads for different sound characters and playing techniques. Natural skins offer a warmer tone, plastic heads sound dryer and react less sensitive to temperature changes.

Hand Drums

with tunable natural skins, beech wood frames with natural lacquer finish, nickel-plated tension hoops

WOOD PERCUSSION

Wood idiophones are a large group of instruments coming from different cultures. They are used for basic rhythm patterns or for complex challenging playing styles. Like the originals, SONOR wood percussion instruments are carefully handmade from select hardwoods. They have great sound quality and a cutting, powerful projection.

Claves

CLA	Claves, Cuban design
LCL 1	Claves, ø 22 mm, rosewood
LCL 2	Claves, ø 17 mm, rosewood
LCL 3	Claves, ø 27 mm, rosewood, original Mexican model
PCL	Primary Claves, beechwood, 1 pair

Claves belong to the basic setup of every percussionist. The new SONOR CLA Claves are built after the original Cuban design with a cutout for better resonance and a conically shaped beater. They have an excellent cutting sound with high projection.

Wood Blocks

Temple Block Set

TT 5	5-piece Temple Block, low to high pitch, ash wood, with mounting bar, (without mallet), recommended mallet: SCH 16
-------------	--

The cross rods on which the wood blocks are attached can be easily taken off the table top stand. That way you can switch the order of the blocks from low to high or high to low.

To play when standing the cross rods can be attached to a regular stand.

CAJONES

Our **Grande** model offers excellent low end paired with percussive snare sound. Natural body and front plate.

Grande Cajon

CAJS GN Front plate made of birch, equipped with 12 steel strand snare wire, offers excellent low end paired with percussive snare sound, 48.5 x 29.5 x 29.5 cm (HxWxD)

Our Standard model has a beech body with a playing surface made of birch. The Bamboo-Snare-Effect-System gives the cajon its unique warm, earthy snare and bass sounds.

Standard Cajon

CAJ ST Front plate made of birch, Bamboo-Snare-Effect-System, warm and earthy snare and bass sounds, 48.5 x 30 x 30 cm (HxWxD)

Cajones for children – 2 playing surfaces!

For children it is often not easy to play on a regular sized Cajon, because they can't touch the floor with their feet. Therefore the size of the SONOR Cajones Chico and Mediano for children were developed in consideration of the European standard for furniture and chairs in educational institutions (DIN EN 1729).

The smaller Chico is especially suitable for children in elementary school age, while the Mediano Cajon can be used until the 5th or 6th grade. Because children at this age grow unequally fast we don't want to define an age recommendation – the best thing is you try it!

Both Cajones for children have 2 playing surfaces, one with the typical snare sound. Therefore the sound hole in the shape of the SONOR mallet logo is positioned on the side.

Mediano Cajon

CAJS MC Body made from MDF, 2 playing surfaces made of birch, equipped with 12 steel strand snare wire, two-color body, 40,5 x 29.5 x 29.5 cm (HxWxD)

Chico Cajon

CAJS CB Body made from MDF, 2 playing surfaces made of birch, equipped with 12 snare wires, blue body, 32 x 25 x 30 cm (HxWxD)

2 in 1 tip:

Because of their double function as instrument and seat the Cajones are suitable as chair substitutes in your music room!

Further Cajones for adults can be found on www.sonor.com in the Percussion section.

PERCUSSION

PRIMERO CAJON PAD

These small and portable pads can easily be played on your lap or held between your knees like a bongo. All models include snare wires and produce an authentic cajon sound, though at lower volumes. Due to a special surface treatment additional sound effects can be created such as wind noise or rain. A non-slip foam rubber at the bottom of the pads guarantees a stable playing surface and a pleasant feeling.

Attractive pricing and space-saving design make this instrument an attractive choice for groups and classrooms.

*space-saving · typical Cajon Sound

BASIS TROLLEY

Trolley System

The SONOR trolley system is very popular due to its versatile use and safe and easy transport of instruments with resonator boxes. A height and width adjustable BasisTrolley BT is the most important module within this system.

All box resonator instruments with mounting plates can easily be mounted with the BasisTrolley adapters. Only chromatic deep bass instruments need two trolleys, i. e. two BasisTrolleys BT.

BasisTrolley Playing Tables can be mounted on a BT without adapter.

BasisTrolley

BT BasisTrolley, height and width adjustable trolley with 4 large, smooth running wheels

BasisTrolley Adapters

AD 1 Adapter for BasisTrolley and diatonic soprano, alto, tenor-alto and bass mallet instruments with 3 brackets, 1 rail 166 mm, 1 rail 300 mm, 3 adapters, 1 assembly key

AD 2 Adapter for BasisTrolley and diatonic deep bass mallet instruments, SSX and ShortScale Xylophone with 4 brackets, 1 rail 166 mm, 1 rail 300 mm, 4 adapters, 1 assembly key

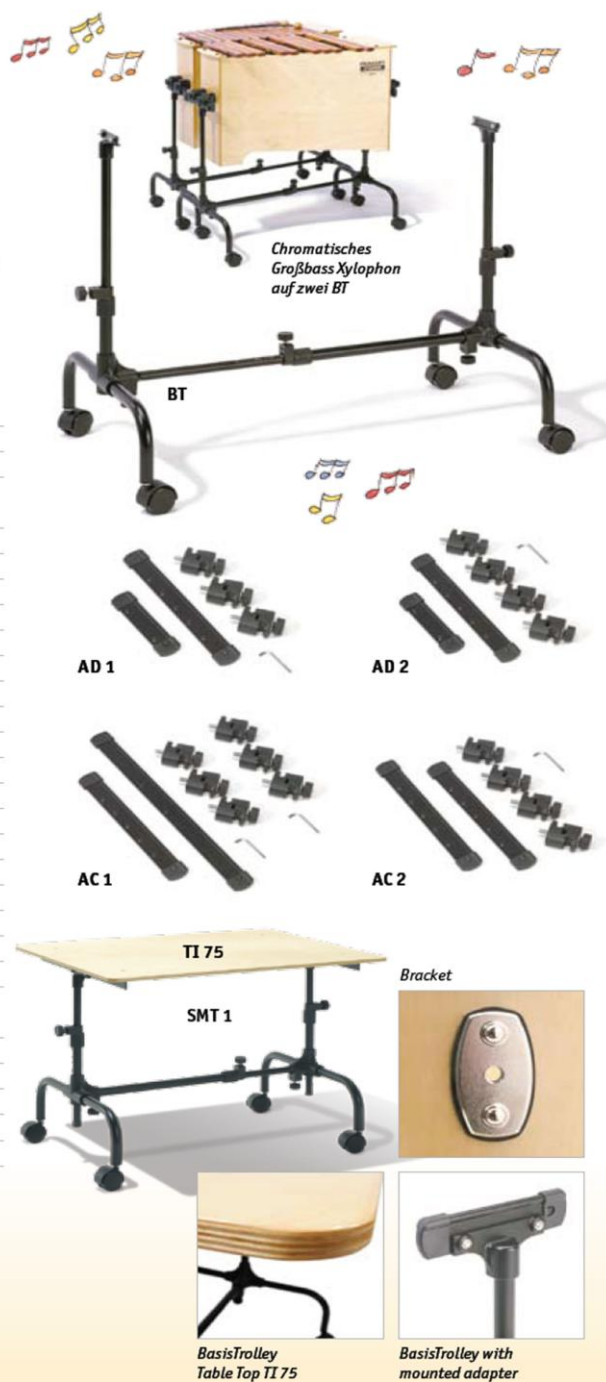

AC 1 Adapter for BasisTrolley and chromatic soprano, alto, tenor-alto and bass mallet instruments with 3 brackets, 1 rail 300 mm, 1 rail 572 mm, 6 adapters, 1 assembly key

AC 2 Adapter for BasisTrolley and chromatic extensions for deep bass mallet instruments with 4 brackets, 2 rails 300 mm, 4 adapters, 1 assembly key

SONOR Multi Table

TI 75 BasisTrolley Table Top, made of solid plies of birch in 10 mm thickness, length 75 cm, width 60 cm
