# STUDIO 49

*Orff*-Schulwerk

Percussion Instruments for Kindergarten, School, Therapy, and Family

2006/07

# STUDIO 49

The beginning of Studio 49 actually goes back much further than one might suspect from its founding year, 1949. In 1928 **Carl Orff**, who will always remain an inseparable part of the history of our company, received an African instrument from a friend from Kamerun, a "Kaffir-Piano". This was built from a small rectangular box and had twelve bars attached to the open side, tied together with string. Orff had found a model for his own work. Before the second World War, the first instruments built with his friend and harpsichord maker Karl Maendler, became indispensable for teaching at the

Güntherschule in Munich and for the development of Orff's Schulwerk.

In 1948 the Bavarian Broadcasting Company had aired several Schulwerk programs and started a deluge of questions about where to get these "Orff instruments". This is exactly what was missing, especially since Karl Maendler had retired from building instruments after the war. One of Orff's students introduced

Orff to Klaus Becker-Ehmck, a young student, who founded STUDIO 49 a few months later. Klaus Becker-Ehmck then built a lithophone entirely from the ideas and wishes of Carl Orff, as well as a cradle-shaped xylophone for the premier of Carl Orff's "Antigone".

Because of our experience making xylophones and other barred instruments, in 1961 it was possible to establish a manufacturing department for professional orchestral instruments such as vibraphones, marimbas, concert xylophones, and concert glockenspiels under the name ROYAL PERCUSSION.

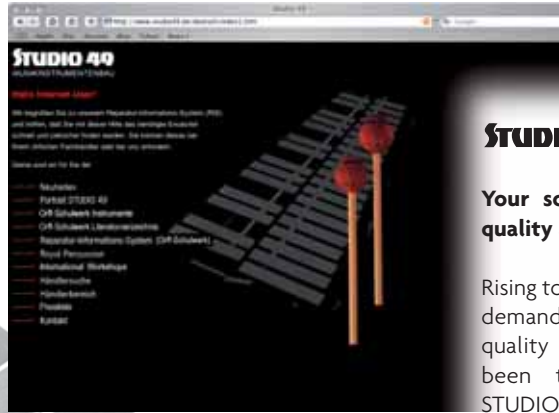

Continuing development, skilled craftsmanship, high quality awareness, and the use of modern production technology have always been the foundation in the production of your instrument. Many skilled craftsmen have been employed by our company for many years, and are dedicated to the quality of our products. **It has always been our aim to build musical instruments of lifelong value**, with timbre and workmanship to satisfy the highest musical standards.

Since 1983 STUDIO 49, with markets around the world, has been led in the second generation by the founder's son, Bernd Becker-Ehmck. Close contacts to Orff-Schulwerk associations all over the world are today – nearly 60 years after the foundation – an important component for the permanent development of our instruments.

Founding company plaque from 1949

Your instruments are made in Germany. Life-long quality requires skilled and experienced craftsmanship. All barred and skin instruments, with the exception of Mountain Rythym (Made in Canada), as well as most of our hand percussion instruments are exclusively produced in Germany.

## STUDIO 49

Your source for lifelong quality and sound

Rising to the challenges and demands of the highest quality craftsmanship has been the hallmark of STUDIO 49 for nearly 60 years. Our aim is to provide you with perfect and permanent tuning, as well as unparalleled durability. Therefore, we offer repair service that will enable you to recondition your instrument, even after many years of intensive use. You can find all spare parts from 1949 models onwards listed on our website.

# STUDIO 49

Suggestions for instrument groups specifically recommended for kindergarten, primary and secondary schools, therapy, and special needs are listed on our website

## Barred Instruments

The sound quality your instrument produces is highly dependent also on the mallet you choose. For the barred instruments of the

Series 500  
Series 1000  
Series 1600  
Series 2000

mallets with specific attributes, such as size and hardness of the head, length and flexibility of the handle, are required. To help you choose the mallet that creates the best sound for your instrument, STUDIO 49 now includes a mallet guide with each new instrument.

# easyCussion

Barred instruments in alto range with c-pentatonic scale.

- Pentatonic scale allows harmonic sound no matter which tones are played in which order
- Highly appropriate for musical accompaniment as well as playing simple melodies
- Notation in c-d-e-g-a-c and do-re-mi-sol-la-do on each instrument
- Compact construction allows the instrument to be played either on your lap or table
- Easy-to-play wide bars
- Attached bars and mallets

- Bars made of bright rosewood, aluminium, or special steel
- Resonance box made of solid pine
- Compact design with integrated handles
- Fabric-coated bar seating for lasting durability
- Simple storage in standing position

## **Alto xylophone** **AX 500**

# Compact Line

## Harmonic tone in a compact style

These instruments offer the ideal prerequisites for music education in nursery schools, kindergarten and preschools, or for home use. The compact style makes transportation easy and saves storage space. These qualities make these instruments especially appropriate for school settings. To ensure balanced sound quality, three resonance chambers are built in the soprano range and six in the alto. In addition, the unique design allows the instruments to be played on tables from a sitting or standing position.

- Bars made of bright Rosewood or aluminium
- Includes  $f\#$  and  $b\flat$  bars
- Patented resonance box made of solid pine
- Multiple resonance chambers for harmonic sound quality
- Compact style with integrated handles
- Fabric-coated bar seating for lasting durability

**The sonorous entry model for the price conscious offers all possibilities of later expansion.** From the soprano to the bass range, in single and double-row (chromatic) models. For professional music lessons, these instruments fulfill every need. High quality bars combined with complex resonance chambers in the alto and bass ranges always produce ample volume and rich, strong sound. The instruments in the bass range are extremely compact. Compared to conventional instruments, the bass resonance box size is drastically reduced (patented design). All xylophones and metallophones in the Series 1600 have a particularly stable resonance box made of 12 mm varnished pine, as well as handles for simple transportation. The handles also serve as supports for the mobile instrument stands.

**You will find stands and tables for barred instruments under Accessories.**

## Glockenspiels

- Bars made of special steel
- Includes f# and b<sup>b</sup> bars
- Resonance box made of solid beech

# 2000 2000

The instruments of the premium **Series 2000** satisfy the highest musical standards and are excellent for use in music and grade schools. All instruments, with exception of the glockenspiels, have resonance boxes of solid wood and handles for easy transportation. The handles also serve as supports for the stands. Adjusting the instruments on the stands is easy with the turn of a screw, for a quick change of instruments and uninterrupted instruction. For maximum volume, the alto and bass instruments include several proportioned resonance chambers and sound-reinforcing lips on the dividers. Only hand-selected and expertly cured Jacaranda **Rosewood** is used in the legendary Series 2000.

As an alternative to Jacaranda Rosewood bars, *Grillodur* bars, made of a highly refined fiberglass material, are available, which hold the pitch through strong changes of temperature and humidity. *Grillodur* bars have outstanding sound and are appropriate for making music in outdoor settings.

The Series 2000 Metallophone bars consist of special profiled, high-quality **aluminum**. This contributes to the exceptionally balanced and warm sound.

Series 2000 Glockenspiel bars have special alloyed and processed steel that creates clear, powerful, sustaining sound. The STUDIO 49 bar seating prevents the interchangeable bars from falling out.

**You will find stands and tables for barred instruments under Accessories.**

## Glockenspiels

Highest quality sound and craftsmanship

- Interchangeable nickel-plated bars made from special steel
- Includes  $f\#$  and  $b\flat$  bars
- Resonance box of solid pine
- Resonator chambers in alto range for brilliant and rich sound

## Xylophones with Rosewood or *GrilloDur* bars

- Includes f<sup>#</sup> and b<sup>b</sup> bars
- Harmonious overtone tuning in alto and bass ranges
- Flexible pins
- Resonance box made of 12 mm solid pine
- Multiple resonance chambers for excellent sound quality
- Attached handles for carrying ease
- Fabric-coated bar seating for lasting durability

Bars made of *GrilloDur*, a highly refined fiberglass material, offers the advantage of extremely high-impact strength as well as resistance against any changes in humidity. This guarantees consistent, permanent pitch in areas with changing climates. Instruments with *GrilloDur* bars are an excellent choice for making music in outdoor settings.

## Bowed Psaltery

Quality craftsmanship, solid maple back and sides, fine spruce top. Includes bow, rosin, and tuning key for precise tuning. Instructions for playing, use, and maintenance are included with each instrument.

## RESONATOR BARS

STUDIO 49 resonator bars are well-suited for a variety of uses and offer limitless possibilities in any setting. They are widely used for music education in kindergarten, elementary, primary, and special-needs schools, as well as pedagogical settings, institutions, and in music therapy. Choose from Rosewood and *Grillodur* bars from soprano to bass range. *Grillodur* is a reliable high-quality synthetic material which has the tonal characteristics of a xylophone bar. This offers additional technical advantages, such as tone stability and humidity resistance, thus guaranteeing constant pitch in changing climates. Instruments with *Grillodur* bars are also well suited for outdoor play.

## Individual Resonator Bells

with note names

- Tuned tone chambers made of impact-resistant plastic material
